Created to inspire

Unlimited inspiration

The EnVision™ Natural Elements range is the result of unique graphic design techniques, a sophisticated mix of the highest quality ceramic inks and SOLOS Glass's manufacturing expertise.

Showcasing 50 carefully selected unique designs replicating the natural beauty of stone and timber, EnVision™ Natural Elements is redefining the possibilities for surface design.

With innovative designs to compliment equally the living space and working environment, the range brings versatility and inspiration to all internal glass applications.

Whether you are looking to design a glass partition, shower screen, dividing wall or splashback, EnVision™ Natural Elements digital ceramic glass printing can help transform your design concept into an architectural reality.

Versatility in every dimension

The design range of EnVision™ Natural Elements has a maximum print size of 3m x 1.2m. To achieve a specific surface size and proportion, a printed image can be applied to one individual glass panel or by using multiple panels aligned to create an image of any scale.

High durability

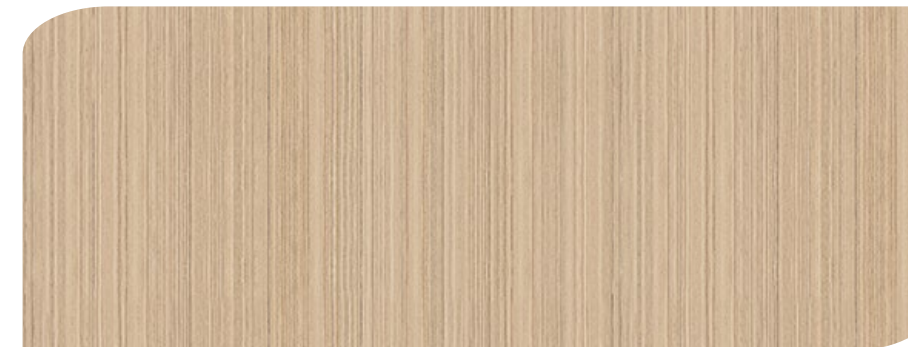

EnVision is manufactured using the highest quality ceramic inks, offering a diverse range of performance functions.

Applied to the glass surface through precise micro-dot printing using the latest digital printing technology, ceramic ink becomes fused to the glass itself during our carefully controlled toughening process.

This forms a permanent, durable surface which is highly resistant to scratches, colour fading, UV and chemicals. It also ensures each piece of EnVision™ meets Grade A safety glass requirements of AS 2208.

Essence of the forest

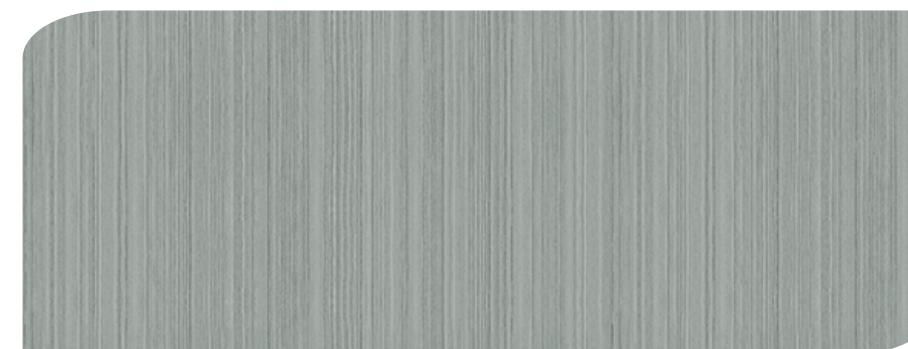

With its natural wood grain finishes in a wide range of colours, the essence of the forest collection delivers a durable solution and modern uptake on a timeless classic.
